

Designed by Jason Bird in collaboration with Paul Fairweather, 1eighth is perfect for school and educational environments but equally at home in the house or café setting. The modular 'bricks' can be arranged in circles, semi circles, any 'snake' pattern or a combination of all to create clustered spaces which engage social interaction. You can even build the walls up and make your very own castle or labyrinth.

Reminiscent of toy building blocks, the 1eighth bench is big fat fun in 15 vivid colours. When arranged radially, each individual bench represents a 1200mm long arc comprising one eighth of a full circle. The benches can be stacked staggered or straight up and down.

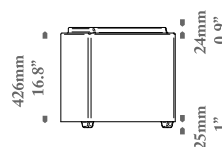

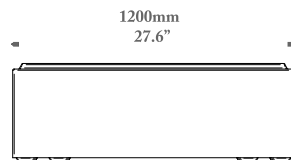

1Eighth is made of 100% recyclable LDPE.  
5 year warranty UV resistant.

# 1eighth

Designed and made in Australia - Long Life/Recyclable/UV Resistant. Custom colours available, minimum quantity or set up charges may apply.

Part of the proceeds of sale from 1eighth go directly towards helping the Pyjama Foundation.
